Here are a few tips that may help improve your health

Tips to help you get started with self-care

Self-care means taking the time to do things that help you live well and can improve both your physical health and mental health. When it comes to your mental health, self-care can help you manage stress, lower risk of illness and increase energy.¹

Eat natural food

Feed your body right with “clean eating.” That means eating foods such as fruits, vegetables and whole grains. It’s also good to steer clear of foods with added sugars, salt and preservatives.

Get regular exercise

Just 30 minutes of walking every day can help boost your mood and improve your health.² Don’t worry if you can’t do 30 minutes all at once. Even small amounts of physical activity add up.

Sleep well, feel good

Getting 7–8 hours of shut-eye is a key ingredient to a happier outlook.³

Look on the bright side

Practicing gratitude and optimism can help improve your overall well-being.
